

Au Pair Quiz: Admin Interface Guide

Purpose

This guide is intended for administrators managing the Au Pair Trial Quiz.

You will use this interface to create, edit, and manage quiz questions, answers, and scoring logic.

The goal is to provide host families with insight into an au pair's childcare compatibility and personality.

Admin Interface Components

1. Question Management

- Add/Edit/Delete questions in English, German, and Chinese.
- Each question allows up to 4 answer options.

2. Answer Tagging

- For each answer, assign:
 - Age group compatibility (T, P, TE, A)
 - Personality traits (Planner, Flexible, Creative, etc.)

3. Scoring Engine (automated)

- Each answer contributes to score counters for traits and age groups.
- No need to define numeric values manually — use tags.

4. Result Summary Logic

- After submission, the system calculates:
 - Most suited age group(s) based on answer frequency.
 - Dominant personality traits.
 - A short profile summary generated automatically.

5. Family View

- Host families only see the final profile summary and age group recommendation.
- Individual answers are hidden for privacy.

6. Notifications

- Families are notified automatically when a quiz is completed.
- Admin can optionally approve before releasing results.

7. Language Management

- Ensure all questions and options are maintained in 3 languages:
 - English
 - German
 - Chinese
